

## Heated Material Supply Hose ¾" ID X 10' lengths.

- Heated ¾" material supply hose from the transfer pump to the Proportioner or Meter.
- With heated material in the drums, it is very helpful if the hose does not cool down when temporarily stopping.
- In un-heated drums, the material is warming up as it travels to the Proportioner or Meter.

- **¾" ID diameter 10' section. 120-Volt AC and 740 watts of heat!**
- No external temperature controller to have to pay extra for and worry about!
- Temperature is adjustable up to 150° F.
- Hose has a 180° F Thermal limit Safety Switch.
- Unique even heat throughout the hose.
- The most economical heated hose in the Industry.
